

ENERTECH UPS PVT LTD- APPLICATION NOTE

SOLAR POWERD TEXTILE LOOMS

High cost of grid power and power shortages are the main hurdles for the growing textile industry. One-third of the wages that the job working units get goes toward power cost.

Solar power harvesting is the only cost effective solution to overcome the power challenge.

ENERTECH UPS PVT LTD. (Pune- Maharashtra based company) has successfully implemented the solution for a 12 power loom unit in association with its system integrators. The implemented solution comprises of a 10KVA solar PCU –ENERTECH ATLAS Model, VFD, solar photovoltaic modules and tubular batteris.

Key features:

- Uninterrupted power supply- No dependency on Grid power
- No Voltage fluctuations
- Noise free operation
- Reduction in Power bill
- No pollution
- No Maintenance
- Eligible for attractive subsidy from banks with Lower interest rates
- Roof top of the mill can be utilized for installation of solar panels
