ABOUT SUNMAGIC SERIES

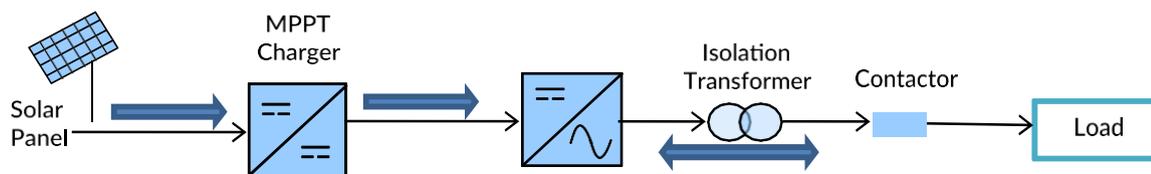

Enertech® is the Solar Hybrid PCU Manufacturer Company in India, started manufacturing and supplying different kinds and models of solar power generating systems since 1989.

Enertech® products are designed with its patented conversion technology to deliver the highest, Performance, Reliability & Efficiency the industry to go along with the quality and set the benchmark for technical excellence.

SunMagic Series is the ultimate combination of streamlined flexibility availability & sustainability to provide the solution through Single PCU.

SOLAR WITH GRIDLESS & BATTERYLESS

Enertech® is also known as a gridless and battery less solar hybrid inverter manufacturing company in India. These can work even without grid /electricity and battery.

Sun magic PCU both single phase and three phase is having an optional feature to configure and operate it without batteries as well as grid.

If sufficient wattage of solar power is available there is no need of grid line. In the morning and evening, we can reduce output AC load because of the low availability of solar power. This power saver can solve the power problems in deserts, farm, forest, and for the working of water pump, air conditioner, fan loads, motor equipment's and other electrical products.

The solar hybrid inverter caters to all the needs of various sectors and also works with maximum efficiency.

NEED OF GRIDLESS AND BATTERYLESS FEATURE

Enertech® has developed this solar hybrid inverter meant for commercial / industrial purposes and daytime use. Here we can avoid storage batteries, save space and money. Through this system we get full efficiency of solar power what we use for generating power. In Day time.

We get energy from Sun and it is enough for us to run our load. This type of Solar Inverter is suitable for any kind of load that we operate in day time.

The Solar Hybrid inverter has various remarkable features which act as an added benefit when compared with other Inverter.

FEATURES:

- IGBT or MPPT with PWM intelligent charging technology.
- Work with solar power, the best way to save money using natural resource. Protection from lightning.
- Over Load Protection.
- Independent Digital display inverter input and output voltage, load, etc. Visual Indicators.

ADVANTAGES:

- When solar energy is available then inverter is working over the solar
- It will work on Solar as well as DG set.
- Cost Effective
- Gridless and Battery less Mode PCU will sync with solar power & supply power to the Load.
- If Customer needs in future, he can use the batteries to connect the energy storage.

In Future you can use battery bank also to get solar energy in night time. Also, our solar hybrid inverter can be used for lighting load in day time on solar without mains.

ENERTECH UPS PVT. LTD.

S. No. 399/1-2, Bhare, P. O.
Ghotawade, Near Pirangut,
Taluka- Mulshi
Dist.- Pune - 412115

Domestic and International Presence
7 x 24 x 365 Customer Service

Our Offering

Online UPS, Static Frequency Converter,
Solar UPS, Industrial Battery Charger
